TOTAL SEATING SOLUTIONS

**THE SKIPTON
SINGLE MOTOR
LIFT & RECLINE CHAIR**

**THE REVOLUTIONARY
AIRLITE SEATING SYSTEM**

THE SKIPTON SINGLE MOTOR LIFT & RECLINE CHAIR

The **SKIPTON** is a high specification lift and recline chair, featuring both 'Tilt-in-Space' and an adjustable sub-frame. This system can be set, by the installer, to one of three positions:

Lift with Full Tilt; for maximum assistance with sitting and standing.

Lift with Shallow Tilt; for those users who do not need the full tilt.

Vertical Lift Only; ideal for use in Care Homes, where adjustable seat height makes one chair suitable for a variety of users; and by Carers, allowing the chair to be raised to a more comfortable height.

To aid posture control the **SKIPTON** has an internal tilt in space. The seat to back angle remains the same, dramatically reducing the effects of shearing associated with some traditional recliners

The simple two-button hand control and limited recline, makes the **SKIPTON** an ideal chair for use in any caring environment.

There is a choice of back styles for this chair: the Waterfall Back (pictured) and the Button Back.

The waterfall back style features a three-section fibre filled backrest with each section individually adjustable to suit the user. This feature provides exceptional comfort and excellent pressure distribution properties. Please state which style when ordering.

AIRELITE SEATING SYSTEM

The **SKIPTON** can now be supplied complete with the Revolutionary Airelite System, combining the very latest technology in **Pressure Relief** and **Dynamic Air Therapy** with a Quality Rise and Recline Chair.
